

Crystal Blue Water Structuring Units, Frequency Enhancement Technologies & Structured Biological Supplementation are transforming modern Agriculture and our daily lives.

**We are about to turn much of what you think you know about water
UPSIDE
DOWN ...**

Water is constantly using motion, light and minerals to 'maintain' its' optimum molecular structure ... and we at Crystal Blue Enterprises are duplicating nature's way of doing just that with our water units.

Water delivers most of what is needed to sustain & support all life on earth and 'Structured Water' is able to do so in a much greater & highly efficient way.

In 1974 German biophysicist, Fritz-Albert Popp proved the existence of bio-photons (tiny bundles of light) in all life forms and developed a bio-photon theory to explain their possible biological role and the ways in which they may control life's processes.

Research has also revealed that the more bio-photonic energy there is within water, the greater is its' ability to enhance both health and healing.

*What makes our Crystal Blue Water Structuring Units
the world's most advanced, well-engineered and
effective solution for structuring water?*

All of our in-line units are computer-machined, individually hand-crafted, precision instruments made of the finest food-grade NSF, ANSI and national & international plumbing code-compliant materials such as:

- * Surgical Grade Stainless Steel
- * Pure Copper
- * Precision Ground Glass

Add the genius of incorporating the 432 Hertz frequency into all of our units and the science of water enhancement has now been raised to a level never seen before.

These advanced devices are the result of years of hard work on the part of dedicated scientists, engineers and Crystal Blue's core team of researchers who are together responsible for our units unmatched design, engineering and performance. Our units have been proven in ongoing university-backed laboratory studies and consumer testing to be far more effective than any other water structuring devices yet developed.

Crystal Blue Water Structuring Units are available in sizes to fit in-line in piping from 1/2" to 10" making them equally effective for home, apartment, greenhouse, livestock, agricultural use. Indeed, our technology makes excellent water available for any type of application.

Everything is Energy

STRUCTURED WATER FUELS ALL LIVING CELLS

After running water through our Crystal Blue Water Structuring Units it's energy increases by **300%**

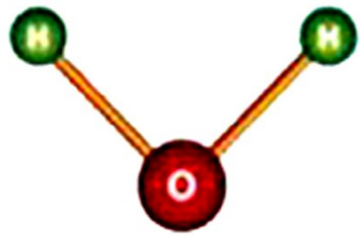

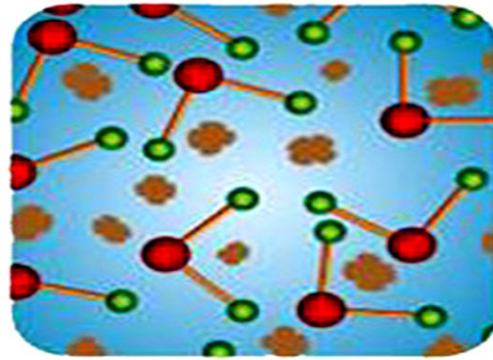

Our Crystal Blue Water Structuring Units duplicate Nature's way of enhancing water at the molecular level by :

- 1) Causing the water to flow through a collection of high grade silica glass spheres precisely arranged in a geometrical pattern known as the 'flow form' - thus *VORTEXING (or spinning)* the water as it does when it tumbles over rocks in a stream.
- 2) This effect also produces a natural phenomenon known as *PIEZOELECTRICITY* due to the slight pressure exerted by the water on the silica glass spheres as it passes over them.
- 3) This natural movement enhances water's ability to collect, store, conduct and convey *INFORMATION & ENERGY* at the cellular level which promotes greater hydration and anti-oxidant benefits.
- 4) Lining the inner walls of each Crystal Blue Water Structuring Unit is a proprietary blend of *CRYSTALS & MINERALS* that produce measureable amounts of Electro Magnetic, Infra Red & Visible Light as well as Scalar Energies.

**TREATING OUR WATER KINDLY -
LIKE THE GOLD IT IS!**

The Results Speak for Themselves !

The Crystal Blue Water Structuring Unit consistently proves its effectiveness in enhancing health and productivity for plants, animals, soils, people and the environment ... for all livestock and for every agricultural crop ... as well as in-home use.

We are confident that our water structuring units will be able to provide a return on investment unequalled by any other agricultural product on the market today. The Crystal Blue Water Structuring Unit is filter free, chemical free, salt free and HASSLE FREE.

The units are clearly among the most valuable water treatment and water conditioning tools available on the market for all residential, garden, livestock and agricultural operations - from the backyard ... to the greenhouse ... to large-scale commercial applications and our customers agree !

"One of the best investments we have ever made for our farm."

**- Dale Stahl (Johnny's brother),
Wheat Farmer**

Best Quality Wheat Ever Produced

This past year, the South Dakota Dept. of Agriculture tested Johnny Stahl's wheat and the germination rate was 100% which is unprecedented and never before seen in the state of South Dakota. Johnny attributes the success of his wheat program to structured water and microbes. Three years ago, his ground was hard with average wheat yields and now his ground is soft with the best wheat yields in the state. Johnny followed our spraying program of applying structured water with a regimen of microbial solutions two or three times per season.

These wheat samples were taken from the fields pictured in the previous slide.

The wheat on the left was planted two weeks earlier without structured water & no soil enhancement.

The sample on the right was planted two weeks later with structured water and soil enhancement.

This 2000 acre South Dakota wheat crop yielded 27 bushels per acre more than comparative fields. Levels of mycotoxin contamination were reduced to less than 5 parts per billion. Post harvest tests on seed germ quality shattered the existing state record with an unheard of 100% seed viability.

Tens of Thousands of Acres, Millions of Chickens and Turkeys, Countless Cows, Thousands of Pigs, Millions of Bees and Multiple Millions of Eggs prove that our Crystal Blue Water Structuring Units are a Safe, Productive and Lucrative Investment.

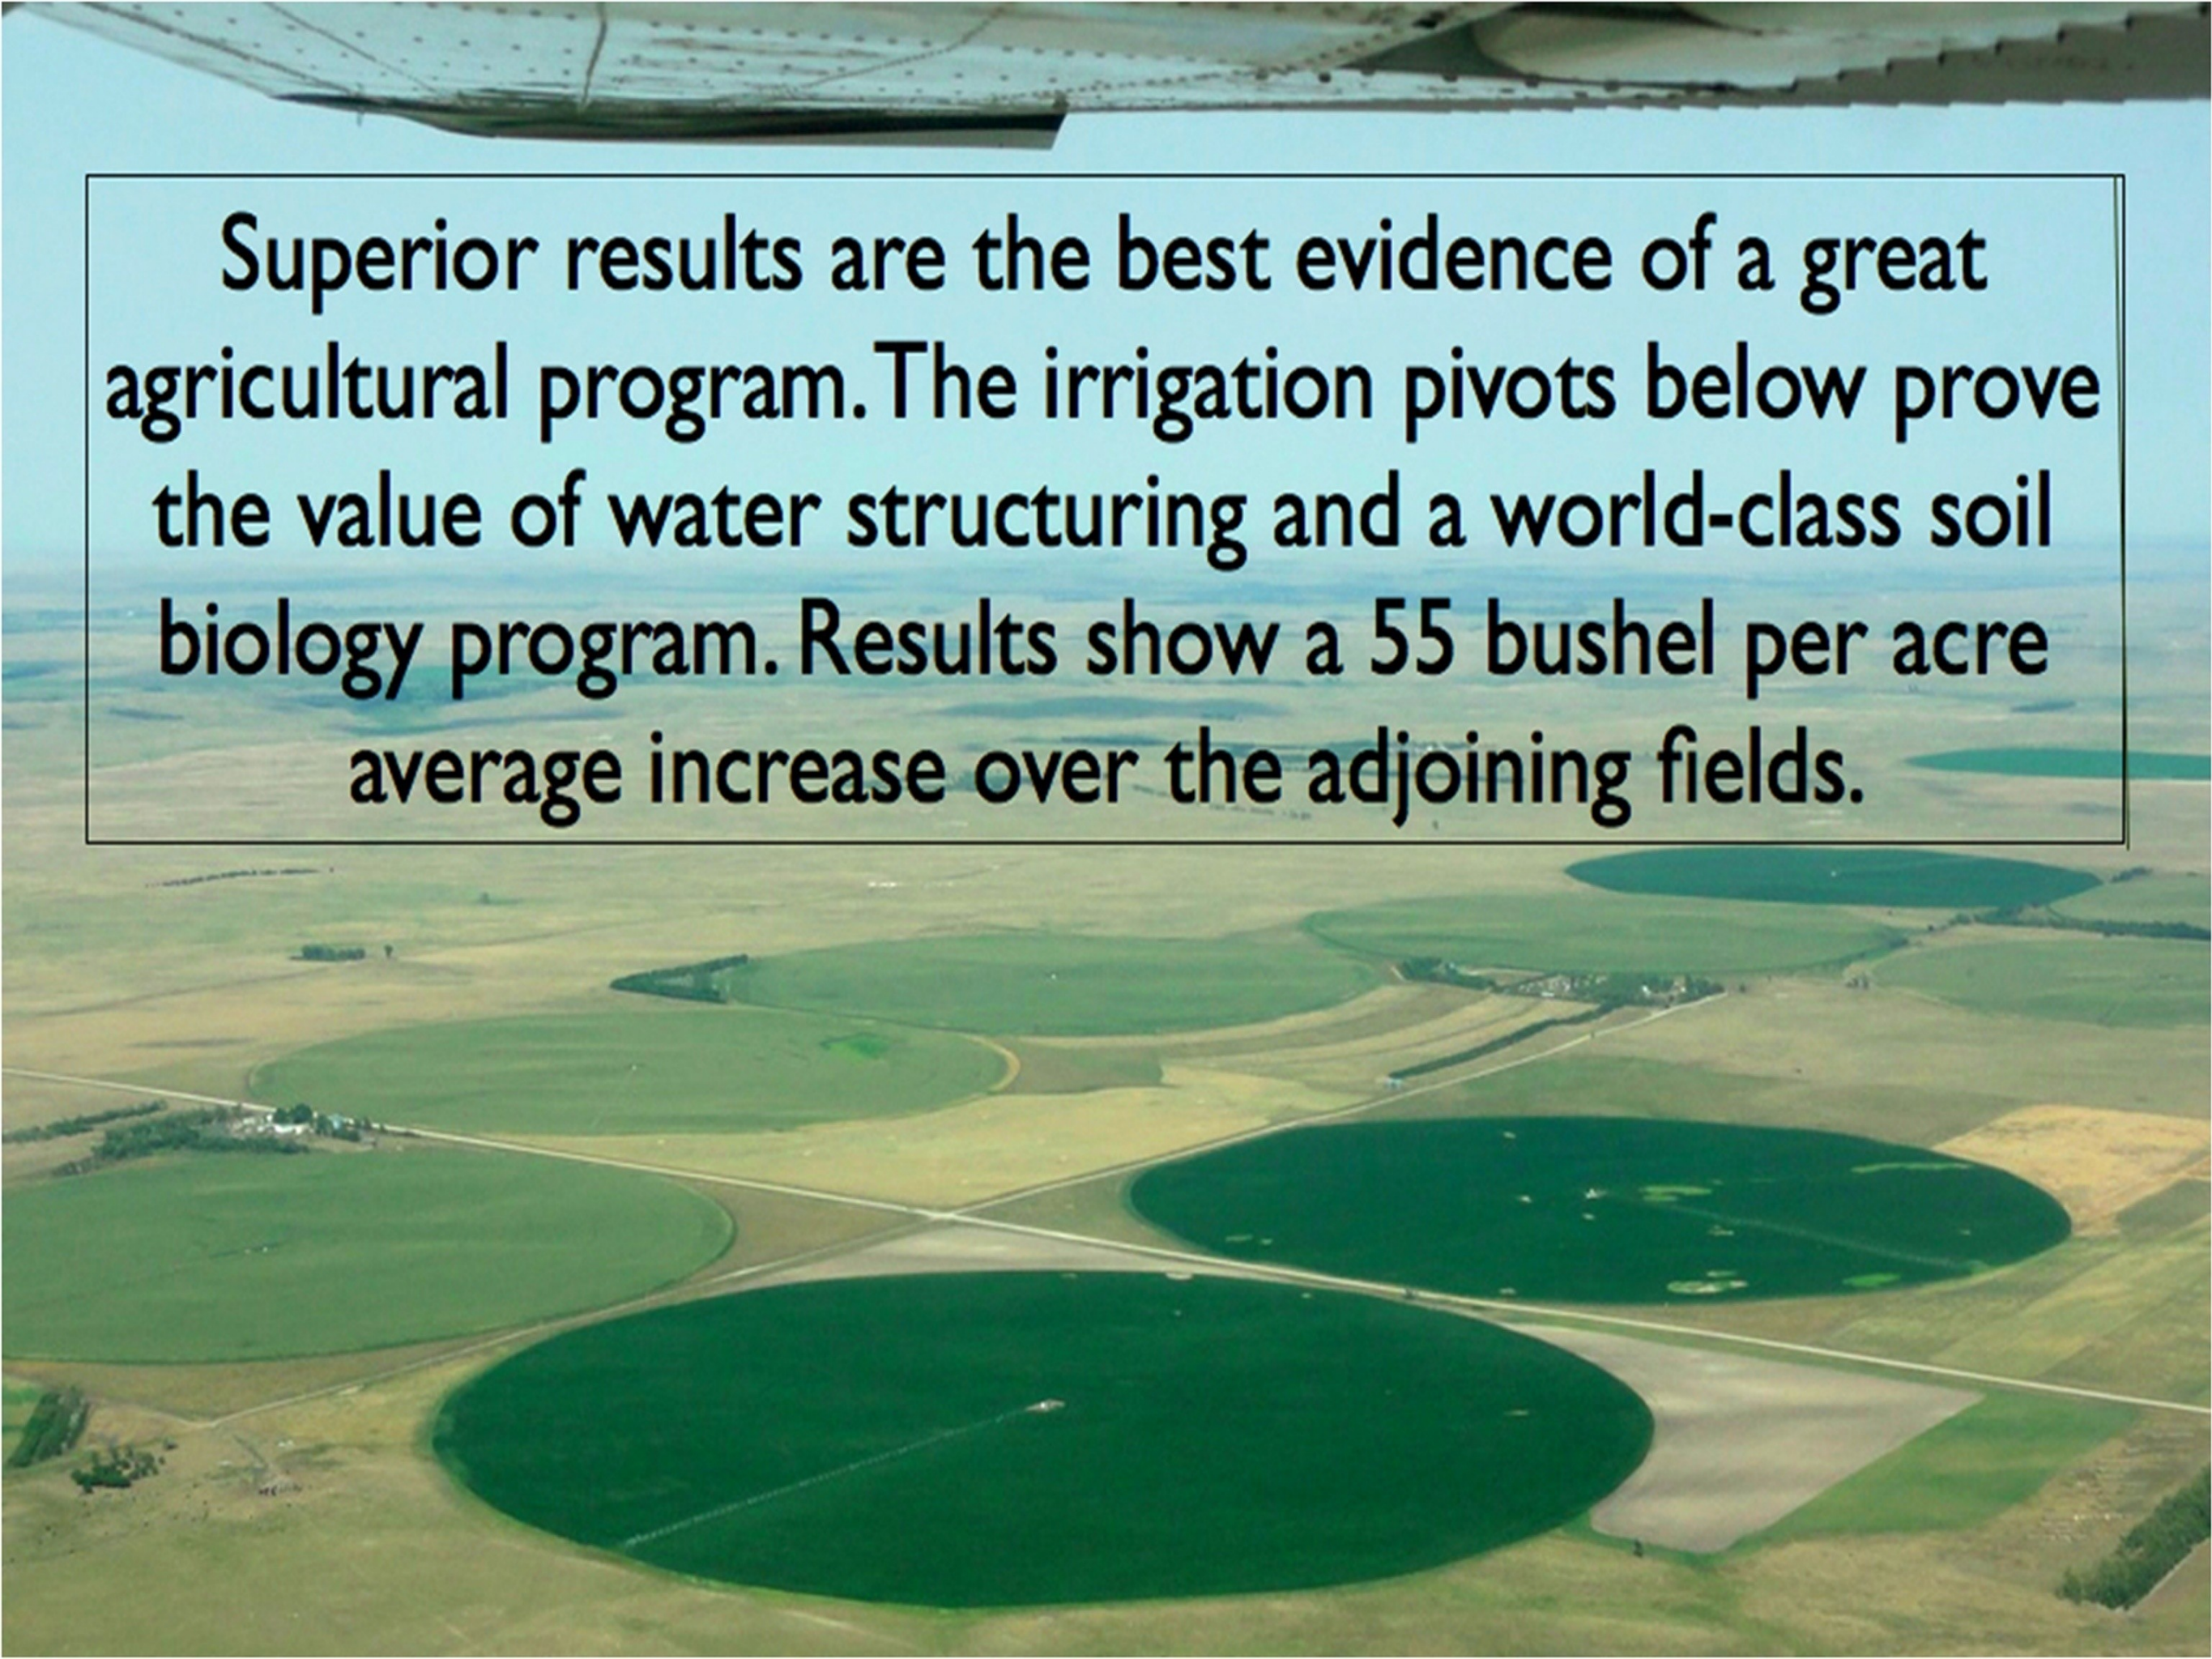

Alfalfa - Higher Quality - Higher Feed Value

A commercial alfalfa cutting company applied Crystal Blue Structured Water while foliar feeding. Results were recorded to show the influence structured water has on the feed value of alfalfa. Hands down, the alfalfa grown with structured water resulted in the highest quality crops that displayed a significantly increased feed value.

Corn, Wheat, Soybeans - 20 Bushel per Acre Increase

Water structuring units were used in recorded corn plot trials at farms in South Dakota and Iowa. Liquid nutrient blends were added to the water supply and passed through the units at pre- and post-emergence. The results were consistent at both locations, with plots showing a nearly 20 bushel per acre increase with Structured Water versus control plots that received the same liquid nutrient blends without it. And at our clients' farms throughout the Midwest, wheat and soybean crops are showing average yield gains of 15 to 20 bushels per acres, with improved grain quality.

Superior results are the best evidence of a great agricultural program. The irrigation pivots below prove the value of water structuring and a world-class soil biology program. Results show a 55 bushel per acre average increase over the adjoining fields.

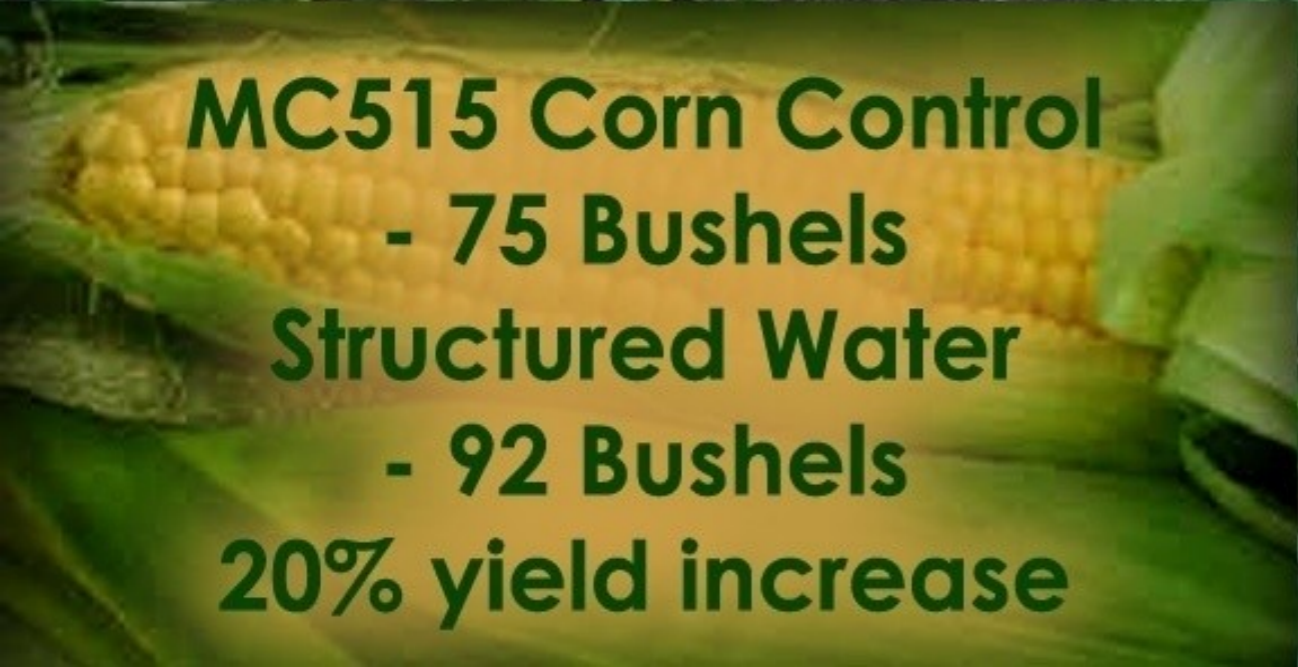

Leonard Hostetler's Strawberries are some of the best ever seen thanks to Structured Biological Supplementation & Crystal Blue Water Structuring Units !

Performance of Structured Water on Growth, Yield and Quality of Cotton and Vegetables

TAMIL NADU AGRICULTURAL UNIVERSITY
WATER TECHNOLOGY CENTRE
COIMBATORE-641 003
2013 - 14

Based on the results of first year field experiments, it is revealed that all the crops under study viz Cotton, Tomato, Bhindi (Okra) which were irrigated with structured water exhibited an increase in germination percentage, vegetable growth, yield and yield attributes.

COMPARATIVE OF SUGAR CANE STUMPS - MUNICIPAL WATER & STRUCTURED MUNICIPAL WATER

GDV IMAGES by - Dr. Krishna Madappa, PhD

Municipal Water

Structured Municipal Water

Each in a separate beaker of water for 1 hour

FOR THE ANIMALS ...

- * Increased immunity to disease
- * Increased size/strength
- * Increased hydration
- * Faster growth rates
- * Increased milk production
- * Less birthing complications
- * Health Maintenance reduced by 30% or more
- * More eggs/bigger eggs & chickens
- * Reduced mortality rates reduced by 30-50%
- * Anaerobic bacteria (& smell) eradicated

HUGE INCREASE IN PROFITS !

Cedar Grove Dairy, South Dakota

Cedar Grove Dairy near Platte, South Dakota, has a herd of 500 Holsteins. Before installing two Crystal Blue Water Structuring Units, they had an average peak milk production of 116.1 lbs per cow. Crystal Blue Water Structuring Units were installed on March 29, 2011 and the average peak performance was recorded monthly. The average peak performance increased in April, May and June. When last measured, average peak milk production was 119.0 lbs per cow.

BENEFITS

- * Increased hydration
- * Increased milk production
- * Increased bio-availability of nutrients
- * Increased daily weight gain
- * Increased feed efficiency
- * Increased calf livability
- * Increased tolerance to temperature extremes
- * Reduced birthing complications
- * Improved cow and calf health

An investment of \$3,000 resulted in a return of \$80,000 in additional profits in just one year. With no need for further investment or maintenance, these units will continue to generate profits for the Cedar Grove Dairy for generations to come.

Increased milk production is a direct result of **increased hydration** which is the key issue in milk production and is the **missing link** to countless biological functions in the body. Hydration is simply an increase in the availability of hydrogen to body cells and an increase in hydrogen to body cells results in an increase in cell energy which in turn results in more efficient milk production and increased vitality and health. Our Crystal Blue Water Structuring Units also facilitate the transfer of beneficial electromagnetic waves into every cell of a cow's tissues resulting in increased immunities and a decreased need for pharmaceuticals and antibiotics.

Hostetler's Poultry Farm, Missouri

"We invested \$5,000 for water structuring units at our 42,000 bird operation. Livability went up 5% giving us about 2,000 more birds. All of our birds started laying sooner and stayed at peak longer, which meant an extra 50,000 dozen eggs. Our earnings increased by an average of \$4 per bird."

- Marion Hostetler, Missouri

BENEFITS :

- * Chickens started laying younger;**
- * Eggs were up to size quicker and case weight came up faster;**
- * Mortality was lower giving one farm 2,000 more birds in production over previous flocks;**
- * Ammonia and manure smell disappeared;**
- * Faster growth rates, higher production at peak and the peak lasted longer at above 96% for 3 to 4 weeks longer;**
- * Net earnings rose upwards of \$10 per bird compared to \$6 per bird without structured water - for 42,000 birds.**

"My sheep have been drinking structured water for only 3 months. I do believe this is the reason my wool shorn in October 2013 was selected for the Sydney Super Fine Wool Auction. I received 3 times more money than at previous sales."

- Jenny Tilse, Farmer, Maitland, NSW, Australia

"Three years ago we lost 20 hives. Two years ago we began installing structured water units on our farm and lost eight hives. So far this year we have been using structured water for the entire farm and have lost ZERO hives."

- Joey Waldner, Bee Keeper

Keeps Your Plumbing & Machinery Like New !

- * Minimal maintenance required
 - * No moving parts
 - * No filters or parts to replace
- * Reduces or eliminates hard-water deposits
- * Appliances & plumbing parts last longer
- * Dissolves calcium & iron deposits in plumbing lines
- * **SAVES BIG TIME & MONEY** on equipment costs
